

Thermolite has designed a high performance blast window for new construction which never requires structural reinforcing. The patented compression release technology and triple glazing absorbs the blast impulse, placing a minimal amount of force into the building so only masonry anchors are required. It is also the most energy efficient product of its kind on the world market.

THEIRS

THERMOLITE

FEATURES

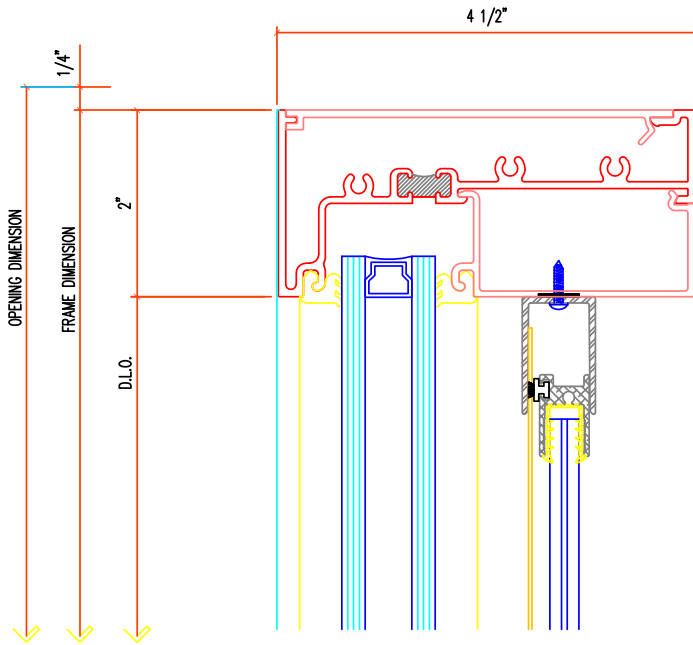

- ✓ **No structural reinforcement required**
- ✓ **Compression release technology shifts blast away from structure**
- ✓ **Only masonry anchors are required**
- ✓ **Exceeds UFC 1-040-01/02 Standards**
- ✓ **Extensively used in federal agencies & DoD**
- ✓ **Blast pressures = 20 psi and up**
- ✓ **Fast installation**
- ✓ **Less expense for same value protection**
- ✓ **Made in the USA – Veteran Owned**
- ✓ **GSA Federal Supplier Schedule Contract # GS-07F-0116H**

Thermolite's blast window system is dynamic and actually moves with the blast impulse, so it does not require the heavy steel reinforcement of other blast windows.

As a result, our system costs less, is quickly installed and can save your firm and your customer millions of dollars and weeks of time.
